

HOW DO I DETERMINE MY HAT SIZE?

To determine your hat size, measure around your head (using a cloth tape measure) above your ears and eyebrows; this is where your hat would normally sit. If your head size falls between two hat sizes, use the larger size of the two.

If you are between sizes, please notify our customer service department. There might be a way of altering the hat size.

If the hat doesn't fit, please contact our customer service department. Manufacturer's sizing standards may vary slightly, and a piece of foam "hat tape" can often be inserted under the band to comfortably alter a loose fit. If an item cannot be satisfactorily altered, we will exchange or return it for a different size.
